

2026

PRODUCT LIST

High-Performance Cell Culture Media,
Supplements, and Reagents for 2026 and Beyond

WELCOME TO 2026 – THE YEAR OF INNOVATION!

Harry Brack,
Managing Director,
Capricorn Scientific GmbH

DEAR CELL CULTURE ENTHUSIAST,

At Capricorn Scientific, we continuously challenge ourselves to move science forward. Over the past year, we have expanded our horizons to better support your research and production needs across the cell culture spectrum - and beyond.

In 2026, we are excited to share what's new:

- » **Next-Generation Upstream Media (Q1|2026)**
Expanding our chemically defined portfolio for CHO, HEK, Vero, and other production cell lines.
- » **Specialized Cell Culture Solutions (Q2|2026)**
Dedicated media for stem cells, T cells, and other advanced cell types in research and therapy.
- » **Scalable Production**
From small-scale batches up to 2,000 L designed to fit every stage of development.
- » **Extended Portfolio of Powders**
High-quality powder media to streamline complex workflows and ensure reproducibility.

We are proud to be your partner on this journey, helping you push the boundaries of science and production. Together, let us make 2026 a year defined by progress, creativity, and cell culture innovation.

SHAPING OUR NEXT CHAPTER

New 4,000 m² Production & Warehouse Facility

To support our rapid growth and ensure long-term security of supply, Capricorn Scientific is expanding into a new 4,000 m² production and warehouse facility. This site significantly increases our manufacturing capacity and strengthens risk mitigation through the implementation of a fully parallel production line. The expansion is planned for early 2026, with additional cleanrooms and advanced infrastructure scheduled for completion by the end of 2026. This investment ensures even greater reliability, scalability, and flexibility for our customers.

>> 2016
FOUNDING

Capricorn Scientific was founded in 2016 as a German manufacturer of cell culture media, sera, and reagents.

>> 2018
ISO CERTIFICATION

With the ISO 9001 certification, Capricorn Scientific received confirmation of the highest quality standards and outstanding service.

>> 2023
NEW FACILITY

Investment in a state-of-the-art pharmaceutical production facility: 1,350 m² production area and QA laboratories are operated reliably by our team of highly experienced experts.

>> 2024
GMP GUIDELINES

Working according to GMP guidelines and integration of a Water for Injection (WFI) system.

>> 2026
NEW EXPANSION

4,000 m² expansion for production and warehouse.

Your Partner in Cell Culture

Our slogan embodies our vision: We want to be the partner you can rely on – together, we will tackle your projects. Our team consists of qualified and experienced scientists with a background in cell biology. We know what is important in cell culture. That's why we develop products that are perfectly tailored to your needs.

Capricorn Scientific is a globally operating German biotechnology company that produces media, reagents, buffers, and sera for cell culture.

Our customers rely on the quality of our products and the personal SERVICE that we can offer as a mid-sized company.

**Distribution

Our Distributors Worldwide

We are proud to be able to offer our products anywhere in the world through our extensive global distributor network. Our distributors are trusted partners, carefully chosen to share our values and passionate about serving the needs of cell culture laboratories.

OUR DISTRIBUTORS

**SCAN AND
DISCOVER**
Our Worldwide
Distribution Partners.

www.capricorn-scientific.com/distributors

Why Are Our Distributors Exceptional?

Customer-focused individual support:

Our partners are experts in their field and market. With direct contact through our distributors, Capricorn Scientific's customer service ensures personalized, one-on-one support.

No language or cultural barriers:

Our representatives are locals, just like you. This avoids language and cultural barriers, so you can communicate with our partners in your own language.

Fast availability:

Our partners ensure rapid access to our products worldwide through their local warehouses.

Optimized transport of goods:

By consolidating shipments to our distributors, we optimize transport volumes, reducing freight costs and minimizing CO₂ emissions.

Added Customer Value:

- Personalized support in your language
- Rapid delivery of Capricorn Scientific's products
- Competitive and favorable pricing

MODERN *Production*

Our new, automated production plant enables production capacities of up to 2,000 L. Filtration and filling are carried out under the highest quality standards in controlled cleanrooms.

In the Heart of Germany

Our 1,350 m² state-of-the-art production facility features 350 m² of cleanroom area and is characterized by the spatial separation of products with animal components and animal-free products.

While only animal-free products are manufactured in the lower part of the building, cell culture products containing animal components are manufactured in the upper production area. This eliminates the risk of cross-contamination.

- ① ✓ 1,350 m² Production Area
- ② ✓ 350 m² Controlled Cleanrooms
- ③ ✓ Spatial Separation (animal/animal-free)

Our fully automated production plant for liquid media is designed for large-scale capacities of up to 2,000 liters.

In addition, we are now also producing powder on a large scale. Our powder media are manufactured using state-of-the-art milling and blending equipment to produce flawless products.

QUALITY

SETTING THE NEW STANDARD

At Capricorn Scientific, quality, reliability, and a secured supply of cell culture products are our top priorities. Our excellent products and our unique customer service support all your projects.

ISO 9001 & ISO 13485: REQUIREMENTS AS BASIS OF OUR QMS

Our products are manufactured with top-notch quality system regulations under strict cleanroom conditions, and in accordance with the current requirements.

We have demonstrated our commitment by providing the highest level of customer satisfaction, continual improvement, and effective risk management. Our quality management system covers all aspects of our operations, from product development and production to delivery and after-sales support.

Working with ISO 9001 and according to ISO 13485, our customers can trust that our products and services are consistently of excellent quality and meet their expectations.

cGMP MANUFACTURING: SETTING A NEW BENCHMARK

In 2025, Capricorn Scientific advanced to full cGMP compliant manufacturing, establishing a new level of quality and reliability. With upgraded process controls, and advanced cleanroom technology, production now meets the strictest international standards.

IVDR CLASSIFICATION: IN VITRO DIAGNOSTIC (IVD) PRODUCTS

With the IVDR setting higher safety and accuracy standards for IVDs, we ensure full compliance and reliable quality. Our close work with authorities makes our team one of the first manufacturers authorized to deliver CE-marked reagents.

PACKAGING

LET'S PLAY IT SAFE!

At Capricorn Scientific, quality and service are our top priorities. This also includes ensuring our high-quality products are shipped to you safely. We pack our products in robust outer packaging made of reinforced cardboard to maintain the impeccable condition of our products – even on longer shipping routes.

Our frozen products are shipped in insulated polystyrene boxes with sufficient cooling agents to protect the components and maintain quality. The practical inlays prevent direct contact between the product and coolant, ensuring clean transportation and uniform cooling of the product.

All our products are filled into high-quality, durable medical-grade polymer containers to ensure the highest purity and protection of the products. Powder products are shipped in securely sealed containers to protect the valuable contents from moisture.

LARGE-SCALE PRODUCTION

Our formulations can be filled into **single-use bioprocess bags of 10-200 L**, ensuring seamless integration into biotech workflows.

MID-SCALE FLEXIBILITY

Products are available in **100-1000 ml bottles** and **5-20 L** canisters, offering robust and easy-to-handle options.

SMALL-SCALE CONVENIENCE

We now offer a broad range of pre-aliquoted formats – including our established **FBS Minis** and other small-volume units.

YOUR PROCESS. YOUR FORMAT.

Whether you are scaling up, optimizing your workflow, or integrating new process steps, our expanded packaging portfolio ensures that you always receive products in a format suited to your exact needs.

PRODUCT WARRANTY

Please contact Capricorn Scientific immediately to report any problems with the number of products delivered or any problems with transportation. Deliveries will be considered accepted if no complaints are made within three working days after receipt of the goods.

Any complaint due to product inconsistency should be reported to Capricorn Scientific within 14 days.

In the event of non-compliance with these times for notification of defects, we shall assume that the delivery is correct. Any defects reported after this time are beyond the direct responsibility of Capricorn Scientific.

Justified complaints, which are reported within the specified periods, will be accepted by Capricorn Scientific by credit note, replacement, or subsequent delivery.

Capricorn Scientific cannot be held responsible if the products are used in applications that do not comply with the prescribed or recommended use.

Please do not return any products to Capricorn Scientific without prior consultation.

DRY ICE

All frozen products (marked with an ❄️ in this price list) will be shipped in polystyrene packaging containing dry ice.

The cost of dry ice is shown separately on the invoice. Please take the necessary care when opening the package.

PAYMENT TERMS

Our current special price list serves as the basis for invoicing between Capricorn Scientific and our customers.

Our prices are Euro prices, refer to ex-works delivery, and do not include VAT. Freight and dry ice costs are charged separately.

This special price list is valid for the financial year 2026 and is an individual price list for selected customers. The standard prices of our products can be found on our homepage.

The terms of payment refer to standard bank transfers with a payment term of 21 days, strictly net, after receipt of delivery.

ORDERING PROCESS

We recommend that you send your order to Capricorn Scientific by fax, email or via our website. Of course, we also accept telephone orders during our business hours.

To place an order, please provide us with:

- 1 Your internal purchase order number and quotation number, if applicable
- 2 Our catalog number and quantities of the products ordered
- 3 Your complete delivery address and billing address, if different
- 4 Your name, possibly your customer number, and your telephone number
- 5 Your order will be shipped with our standard shipping service provider, unless otherwise agreed upon.

SERVICES

TAILORED SERVICES FOR YOUR CELL CULTURE WORKFLOW

From fast-track custom media development to full-scale manufacturing, ready-to-use supplemented media, and secure serum storage, our service portfolio gives you flexibility, consistency, and full control.

Choose Capricorn Scientific's expertise to accelerate your process and ensure reproducible results.

CUSTOM PRODUCTION

FROM FORMULATION TO FINAL PRODUCT

When off-the-shelf media are not sufficient, Capricorn Scientific offers full-scope contract manufacturing of customized cell culture media. From feasibility evaluation to final delivery, each step is guided by scientific and regulatory expertise — ensuring your formulation meets the exact needs of your process.

KEY FEATURES

- » Contract manufacturing of liquid (> 20 L) and powder media (> 2 kg)
- » Manufactured under cGMP-level conditions in an ISO 9001-certified facility
- » Multiple packaging options: bottles, bags, containers, powder drums
- » Standard lead time of 6–8 weeks with reliable planning

CURRENT TIMELINE

OF CUSTOM PRODUCTIONS

SpeedUP!

FAST-TRACK CUSTOM MEDIA DEVELOPMENT

Accelerate your process optimization with *SpeedUP!*, Capricorn Scientific's express manufacturing service for customized media, buffers, and reagents. Tailored for small-scale testing and rapid prototyping, *SpeedUP!* delivers flexibility and control.

KEY FEATURES

- » Production of customized media, buffers, and reagents
- » Turnaround within 7 business days
- » Batch sizes from 10 ml up to 20 L for pilot and development work

PARA|DYM™

CUSTOMIZED READY-TO-USE MEDIA

Simplify your workflow with *PARA|DYM™*, the manufacturing service for ready-to-use media. Define your serum, additives, and media — we ensure consistency, documentation, and traceable delivery. *PARA|DYM™* helps to eliminate manual supplementation steps and enhances process reproducibility across both research and production.

KEY FEATURES

- » Fully customizable formulations, including serum and supplements
- » Select a Capricorn Scientific batch or use your own serum
- » cGMP-level production with comprehensive QC and documentation
- » Available in bottles or bags for seamless integration into your workflow

MYSTOCK

SMART STORAGE FOR YOUR SERUM

myStock is Capricorn Scientific's free batch storage program.

Secure storage for your tested and approved serum lots

Controlled storage conditions to ensure optimal product quality

Flexible call-off: access your FBS whenever needed

Online stock monitoring for full transparency

MyStock gives you the freedom to reserve your preferred serum lots while keeping valuable freezer space available in your lab. Your products remain exclusively allocated to you and ready whenever your testing process is complete.

GET IN TOUCH WITH US

www.capricorn-scientific.com/mystock

Consistent quality
maintained over time

Optimized lab space thanks
to external storage

KEY FEATURES

- » Secure long-term storage at Capricorn Scientific
- » Simple call-off via personal reservation number
- » Webshop access to monitor and manage inventory anytime

SERA

GROWTH BOOST FOR CELLS

To this day, serum is indispensable for many cell culture applications. Capricorn Scientific supplies a wide range of different bovine and other animal sera with various post-treatment options such as heat inactivation, gamma irradiation, and exosome depletion.

In addition to a wide range of different fetal bovine sera, we also offer numerous other bovine sera as a cost-effective alternative to FBS.

For specific applications, we offer various other sera for cell culture as an alternative to bovine sera, e.g., human serum, rabbit serum, mouse serum, goat serum, and many more.

Each batch of our sera is tested for optimal performance in cell culture. We provide the necessary safety, tracking and documentation to ensure serum performance in your cell culture.

GENERAL KNOWLEDGE
ABOUT CELL CULTURE

» www.capricorn-scientific.com/knowledge-center

FETAL BOVINE SERUM (FBS)

Until now, fetal bovine serum is THE supplement for the majority of all cell culture techniques. It provides cells with valuable nutrients, hormones, and trace elements.

Capricorn Scientific offers fetal bovine serum in different variants for maximum performance in your cell culture: Standard FBS, FBS Advanced with reduced batch variations, and FBS Xtra, a defined FBS with reduced serum content.

We also offer different countries of origin. The origin of our raw serum is strictly controlled and closely tracked. In addition to untreated FBS products, we offer various post-treatment options to match your specific needs.

MEDIA

EXCELLENT CELL CULTURE MEDIA FOR SUCCESSFUL CELL GROWTH

Our wide portfolio of liquid and powder media provides nutrients for every cell culture application. Each of these cell culture media is manufactured according to its well-established original formulation or further developed for the latest innovative applications.

In addition to our classic media, such as DMEM or RPMI, we offer various ready-to-use special cell culture media and cryopreservation media. Our special media are perfectly tailored to specific applications or cell types.

Choose the media of Capricorn Scientific and experience successful cell culture – with attractive pricing.

CLASSICAL MEDIA *LIQUID*

We offer a variety of classical liquid media for cell culture, such as Dulbecco's Modified Eagle Medium (DMEM), Roswell Park Memorial Institute (RPMI 1640), or Ham's F-12 medium. Our classic media correspond to the original formulations that are widely used in all types of cell culture applications.

Our classic liquid media are produced in a wide range of different variants. In addition to high and low glucose concentrations, our media are supplemented with various amino acids and buffer systems and perfectly adapted to your application.

SPECIAL MEDIA

In response to the increasing interest in chemically defined and serum-free culture environments, in cooperation with florabio AS, Capricorn Scientific has developed highly specialized cell culture media that are tailored nutrient supply of specific cell types, such as mesenchymal stem cells. Our special media are manufactured from the highest quality raw materials, providing increased batch-to-batch consistency and improved performance.

DID YOU KNOW?

We Offer All Products in Powder Format Upon Request!
(where applicable)

STEM CELL CULTURE

When culturing sensitive cells, such as mesenchymal stem cells (MSCs), the reliability of the culture medium is key to success. Our animal component-free, defined media for the cultivation of MSCs were developed to promote maximum cell viability in a reliable and consistent culture environment, maintaining the potency of the cells without differentiation.

UPSTREAM MEDIA

In recombinant protein expression, the culture medium plays a major role in the overall process performance. Recognizing the significant impact of cell culture media on viability, cell density, and productivity, Capricorn Scientific has partnered with media development experts to create a comprehensive portfolio of batch, fed-batch, and perfusion media systems, optimized for efficient recombinant production in various mammalian cell lines.

For years, Chinese Hamster Ovary (CHO) cells are the most common expression host for production of biopharmaceutical proteins and monoclonal antibodies. Capricorn Scientific provides different chemically defined media systems for batch, fed-batch and perfusion systems tailored for successful recombinant production in CHO cells.

PRODUCT	VOL.	CAT.NO.	❄
Insectra Sf Protein-free Medium for Insect Cells with L-Glutamine, with Pluronic™	500 ml	SF9-500ML	

MDCK CELL CULTURE

PRODUCT	VOL.	CAT.NO.	❄
MDCKventure Chemically Defined Medium for Virus Production in MDCK Suspension Cells, with Stable Glutamine	500 ml	MDCKV-500ML	

HYBRIDOMA CELL CULTURE

New!

PRODUCT	VOL.	CAT.NO.	❄
HybridomaPlus Protein-free Medium for Hybridoma Cells and Monoclonal Antibody Production w/o L-Glutamine, w/o Phenol Red	500 ml	HY-XRXA	
HybridomaPlus Protein-free Medium for Hybridoma Cells and Monoclonal Antibody Production with L-Glutamine	500 ml	HY-A	
HybridomaPlus Powder Protein-free Medium for Hybridoma Cells and Monoclonal Antibody Production w/o L-Glutamine, w/o Phenol Red	10 L	HY-XRXA-P10	
Hybridoma Supplement Serum-free	50 ml	HCS-F	❄

DIAGNOSTICS

Capricorn Scientific's diagnostics range offers high-quality media and reagents for cytogenetics that you can trust. Take the next step towards quality, reproducibility, and exceptional performance in all your diagnostic applications. Our diagnostic products not only meet but exceed all regulatory requirements for this market sector, ensuring you receive reliable and compliant solutions. Enhance your routine laboratory testing with Capricorn Scientific's trusted solutions!

CYTOGENETICS

When it comes to cytogenetics, the media and reagents you choose for your analysis are of paramount importance. Capricorn Scientific offers highly specialized media and reagents for the cytogenetic analysis of amniotic fluid, peripheral blood lymphocytes and bone marrow.

These have been optimized to provide reproducible results. Simply test our cytogenetic products yourself and let the results speak for themselves!

REAGENTS

IMPROVED PERFORMANCE WITH THE RIGHT SUPPLEMENTS AND REAGENTS

The successful cultivation of cells requires the use of pure, high-quality reagents. In most cases, supplements and additives are added to the culture medium or used directly in the application.

Our comprehensive range of cell culture reagents includes antibiotics, bovine serum albumin (BSA), cell detachment and separation reagents, as well as numerous other important supplements and additives.

Use Capricorn Scientific's supplements and additives for excellence in your field of application. All of our reagents undergo extensive testing and quality control to ensure your complete satisfaction.

BOVINE SERUM ALBUMIN (BSA)

Bovine serum albumin is a protein obtained from bovine blood. It is utilized in fields such as cell culture, molecular biology, protein biochemistry and detection methods. In addition, BSA protein is often used as a reference standard for the quantification of total protein. We offer BSA powder in different types: Standard, Fatty acid-free and Protease-free.

PRODUCT	VOL.	CAT.NO.	❄
Bovine Serum Albumin	500 g	BSA-1T	
Standard Grade	100 g	BSA-1S	
	50 g	BSA-1U	
Bovine Serum Albumin	100 g	BSA-FAF-1S	
Fatty Acid-Free	50 g	BSA-FAF-1U	
Bovine Serum Albumin	100 g	BSA-PF-1S	
Protease-Free	50 g	BSA-PF-1U	

SUPPLEMENTS & ADDITIVES

In cell culture, the growth medium must complement all the missing elements that normally occur *in vivo*. This is achieved by adding general supplements such as glutamine or ITS, or highly specific supplements such as NCS21.

PRODUCT	VOL.	CAT.NO.	❄
Sodium Pyruvate Solution (100 mM)	100 ml	NPY-B	
L-Glutamine Solution (200 mM)	100 ml	GLN-B	❄
MEM Non-essential Amino Acids Solution (100x)	100 ml	NEAA-B	
Stable Glutamine Solution (200 mM)	100 ml	STA-B	❄
NCS21 Supplement (50x)	10 ml	C21-H	❄
Serum-free			
NCS21 Supplement (50x)	10 ml	C21-XV-H	❄
w/o Vitamin A, Serum-free			
N2 Supplement (100x)	5 ml	N2-K	❄
Serum-free			
Hybridoma Supplement	50 ml	HCS-F	❄
Serum-free			
ITS Supplement (100x)	10 ml	ITS-H	
Insulin, Transferrin, Selenium			
Insulin Human Recombinant Solution (5 mg/ml)	5 ml	INS-K	
Glucose Solution (250 g/L)	50 ml	GLC-F	

CRYOPRESERVATION

In the process of cryopreservation, structurally intact living cells are permanently preserved at low temperatures. To achieve this, a special cryopreservation medium is required to protect the sensitive cells during freezing. Our cryopreservation agents enhance the total concentration of all dissolved components and thus reduce the amount of ice crystals formed to protect the cells.

PRODUCT	VOL.	CAT.NO.	❄️
FreezeMe One Cryopreservation Medium with Fetal Bovine Serum	50 ml	FM1-F	❄️
FreezeMe Two Cryopreservation Medium, Serum-free	50 ml	FM2-F	❄️
New! FreezeMe ZERO DMSO-free Cryopreservation Medium for Cell Lines	50 ml 5 x 10 ml	FMZ-50ML 5-FMZ-10ML	❄️

ANTIBIOTICS

We offer a range of high-quality selection antibiotics for transfection of cells and for prevention of bacterial and fungal contamination.

Our top-notch transfection antibiotics can be supplied either as a powder or as a sterile solution, depending on your preferences. Our preventive antibiotic solutions are used to protect your cell culture from undesired microorganisms.

PRODUCT	VOL.	CAT.NO.	❄️
Amphotericin B Solution (100x)	100 ml	AMP-B	❄️

CELL DISSOCIATION

For routine cultivation and other applications of adherent tissue and cell monolayers, cell dissociation is an important process. Knowledge and understanding of which detachment reagent to use for what purpose have a major impact on cell viability.

In addition to products for classical detachment protocols such as trypsin, Capricorn Scientific also offers other, gentler, and more convenient solutions for cell detachment and dissociation, e.g., Accutase or Accumax.

PRODUCT	VOL.	CAT.NO.	❄
Accumax, Cell Detachment Solution	50 ml	ACM-1F	❄
Accutase, Cell Detachment Solution	100 ml	ACC-1B	❄
Trypsin-EDTA (0.05 %) in DPBS (1x)	100 ml	TRY-1B	❄
Trypsin-EDTA (0.5 %) in DPBS (10x)	100 ml	TRY-1B10	❄
Trypsin (0.25 %) in DPBS (1x)	100 ml	TRY-2B	❄
Trypsin (2.5 %) in DPBS (10x)	100 ml	TRY-2B10	❄
Trypsin-EDTA (0.25 %) in HBSS (1x) with Phenol Red	100 ml	TRY-3B	❄
Trypsin-EDTA (0.05 %) in HBSS (1x) with Phenol Red	100 ml	TRY-4B	❄

THE GENTLE DETACHMENT SOLUTION

CELL SEPARATION

In order to conduct research on an isolated cell type, unwanted cells must be separated to avoid interference. Cell separation, also known as cell sorting or cell isolation, is the process of isolating a cell or an entire cell population from a heterogeneous cell solution or tissue.

PRODUCT	VOL.	CAT.NO.	❄
Lymphocyte Separation Medium	500 ml	LSM-A	
Density 1.077 g/ml	100 ml	LSM-B	

BALANCED SALT SOLUTIONS

BUFFER SOLUTIONS: BALANCE FOR YOUR CELL CULTURE

Cell cultures are required to be carried out under thoroughly regulated conditions. Our buffer solutions, supplied as powder or in liquid form, provide the cells with the essential inorganic ions for a stable pH and osmotic pressure ratio.

We offer all classic buffer solutions for cell culture, such as the well-known PBS and HBSS, as well as various additives (e.g., phenol red).

BALANCED SALT SOLUTIONS *LIQUID*

Balanced salt solutions are most commonly used in cell culture to maintain pH and osmotic pressure.

We offer all classic buffer solutions for cell culture, such as PBS and HBSS, as well as various supplements (e.g., phenol red).

PRODUCT	VOL.	CAT.NO.	❄
Hanks' Balanced Salts Solution with Ca & Mg, w/o Phenol Red	500 ml	HBSS-1A	
Hanks' Balanced Salts Solution w/o Ca & Mg, w/o Phenol Red	500 ml	HBSS-2A	
Hanks' Balanced Salts Solution w/o Ca & Mg, with Phenol Red	500 ml	HBSS-3A	
HEPES Buffer Solution (1 M)	100 ml	HEP-B	
Dulbecco's PBS (10x) w/o Ca & Mg, w/o Phenol Red	500 ml	PBS-10XA	
Dulbecco's PBS (1x) w/o Ca & Mg, w/o Phenol Red	500 ml	PBS-1A	
Dulbecco's PBS (1x) with Ca & Mg, w/o Phenol Red	500 ml	PBS-2A	
Water For Injection (WFI) Ph. Eur. Grade sterile-filtered	1,000 ml 500 ml	WFI-1000ML WFI-500ML	
Water, Suitable for Cell Culture sterile-filtered	1,000 ml 500 ml	WAT-1000ML WAT-500ML	

New!

BALANCED SALT SOLUTIONS *POWDER*

All our powder products, such as PBS powder, are manufactured using state-of-the-art grinding and mixing equipment and are fully controlled by our quality department in terms of raw material identity, particle size, and integrity.

PRODUCT	VOL.	CAT.NO.	❄
Dulbecco's PBS (1x), Powder w/o Ca & Mg, w/o Phenol Red	50 L 10 L	PBS-1A-P50 PBS-1A-P10
